

GamePlan Task Board - Detailed Entity Relationship Diagram
Reconstructed from repository client types and Supabase queries

teams
PK id : uuid
name : text
description : text?
FK created_by : uuid
created_at : timestampz
updated_at : timestampz

team_members
PK/FK team_id : uuid
PK/FK user_id : uuid
role : team_user_role
FK added_by : uuid
joined_at : timestampz
team_user_role = member supervisor
Recommended UNIQUE(team_id, user_id)

auth.users
PK id : uuid
email : text
is_anonymous : boolean
created_at : timestampz
Managed by Supabase Auth

profiles
PK/FK id : uuid
full_name : text?
email : text?
role : user_role?
avatar_color : text?
avatar_url : text?
created_at : timestampz
updated_at : timestampz
user_role = member supervisor

Storage: Avatars
object path: user_id/avatar-timestamp.ext
allowed: JPG, PNG, WebP
max client upload: 2 MB
public URL stored in profiles.avatar_url

tasks
PK id : uuid
title : text
description : text?
due_date : date?
is_urgent : boolean
status : task_status
manager_message : text?
FK user_id : uuid
FK team_id : uuid?
FK assigned_to : uuid?
FK assigned_by : uuid?
FK created_by : uuid
created_at : timestampz
updated_at : timestampz
task_status = todo in_progress in_review done

Verification Notes
1. Columns are verified from TypeScript row types and Supabase queries.
2. Migration/DDDL files were not present in the uploaded repository.
3. SQL data types, nullability, FK actions, defaults, indexes and RLS policies should be confirmed in the Supabase dashboard before treating this as physical DDL.
4. Question mark (?) denotes nullable in the client row type.
